Summary

The symposium will explore three main issues:
Experiences and embodiments: How do social actors or institutions cope with and experience the lack of resources? How do contexts of scarcity prompt them to create or to reflect on new forms of care? How to understand new forms of solidarity, care and humanitarian interventions in austere times?
Locations and circulations: How do austerity measures, interventions and resistances circulate across the Global South and North, in times where a global neoliberal economy imperative prevails? In which ways can a look at circulations help to provincialize austerity while acknowledging its global scope?
Temporalities and meanings: What does austerity mean within various temporal contexts worldwide? What are the differences and similarities between structural adjustment policies of the 1980s in the Global South and current austerity measures?

The financial crisis of 2008 and the austerity policies implemented as a response had severe consequences on peoples’ health and practices of care. Health systems based on principles of social welfare and universal access are increasingly considered “unsustainable”. In contexts of scarce resources and increasing state debts, new ways of prioritization and triage emerge.

And yet, scarcity is not a new question of the 21st century. In many parts of the world, particularly the so-called Global South, limited means as well as structural shortages have been a permanent feature of healthcare since the 1980s. What seems to be relatively new though, are policies, practices and experiences of scarcity and austerity that converge across the global North and South.

We wish to link the materialities of everyday healthcare in economically austere times with the moral visions, societal values, and policy approaches that influence how medicine and healthcare are conceived and practiced in different locations today. We want to debate the highly controversial nature of austerity and scarcity policies, and inquire about their deep entanglement in moral, political and economic debates on what constitutes the “right” or “just” measure of spending, redistributing and consuming care.

Registration & Fees

SYMPOSIUM FEES
3 days: CHF 120.– regular fee
CHF 60.– SEG/MAS members
CHF 40.– Students (with student’s identity card)
2 days: CHF 90.– regular fee
CHF 45.– SEG/MAS members
CHF 20.– Students (with student’s identity card)
1 day: CHF 50.– regular fee
CHF 25.– SEG/MAS members
CHF 10.– Students (with student’s identity card)

Additional fee for payment on site: CHF 20.–

Making medicine in austere times:
materialities, moralities and policies of care

MAS-Symposium
University of Bern | 11-13 June 2019

Summary

The financial crisis of 2008 and the austerity policies implemented as a response had severe consequences on peoples’ health and practices of care. Health systems based on principles of social welfare and universal access are increasingly considered “unsustainable”. In contexts of scarce resources and increasing state debts, new ways of prioritization and triage emerge.

And yet, scarcity is not a new question of the 21st century. In many parts of the world, particularly the so-called Global South, limited means as well as structural shortages have been a permanent feature of healthcare since the 1980s. What seems to be relatively new though, are policies, practices and experiences of scarcity and austerity that converge across the global North and South.

We wish to link the materialities of everyday healthcare in economically austere times with the moral visions, societal values, and policy approaches that influence how medicine and healthcare are conceived and practiced in different locations today. We want to debate the highly controversial nature of austerity and scarcity policies, and inquire about their deep entanglement in moral, political and economic debates on what constitutes the “right” or “just” measure of spending, redistributing and consuming care.
Wednesday, 12th June 2019

09:00 PANEL 2 – Dispositifs
   Chair: Iba
   UniS A201
   Rodolfo Maggio: Coping with austerity: parents and early intervention services in Oxford and north-side Dublin
   Heath Cabot: Dealing with Donations in Athens’ Social Solidarity Clinics and Pharmacies
   Jessica Pourraz: Between Abundance and Scarcity: Questioning conflicts between local production of antimalarial medicines in Ghana and the Global Fund medicines distribution policies

12:00 Lunch

13:30 PANEL 3 – Care
   Chair: Iba
   UniS A201
   Ciara Kierans: Chronic Failures: kidneys, regimes of care and the Mexican state
   Erin Koch: Protracted Displacement, Scarcity and Strategies of Care in the Republic of Georgia

15:30 Coffee Break

16:00 INTERLUDE – Film Screenings
   UniS A201
   Film The Marketable Patient (by Leslie Franke and Herdolor Lorenz)
   Film Los Cuidados (by Raquel Congosto and Antonio Girón)

19:00 POSTER SESSION with Apéro Riche
   UniS Dining Hall
   Inayat Ali; Francesca Cancelliere; Jean-Marc Goudet; Jessica Neicun; Maria Stylidou.

Thursday, 13th June 2019

09:00 PANEL 4 – Temporalities
   Chair: Julia Rehsmann, MAS
   Main Building Room 501 (Kuppelraum)
   Janina Kehr: Rhythms of Care and Violence in Austerity Spain
   Theodore Powers: Austerity and Public Health in Post-Apartheid South Africa: People, Policy, Temporality
   Jean-Paul Gaudillière: Scarcity, triage and the politics of needs: the long durée of Primary Health Care in Kerala.

11:30 Coffee Break

12:00 FINAL ROUNDTABLE – Austerity in medicine and beyond
   Moderation: Claire Beaudevin and Janina Kehr
   Main Building Room 501 (Kuppelraum)
   with Michi Knecht, Christoph Gradmann and Patricia Matos

Organization

Janina Kehr, MAS, University of Bern, Institute of Social Anthropology
Daria Ledergerber, University of Bern, Institute of Social Anthropology
Jean-Paul Gaudillière, Inserm and Cermes3, Paris
Claire Beaudevin, CNRS and Cermes3, Paris
Yannis Papadaniel, University of Lausanne
